

**Leading developer of Revit® Families  
for the foodservice industry**

# Helping build better kitchens through **Revit® 3D Model System** technology

## What is Revit?

Revit® is a design software that was acquired by Autodesk®, the makers of AutoCAD.® The software has been evolving for over 20 years and has become the industry's choice for collaborative design.

Revit uses Building Information Modeling (BIM) to accurately develop, schedule and connect mechanical systems. The drawing is dynamic, meaning that changes are impacted throughout the model. So, if you change a piece of equipment, it will modify all the views and mechanical properties and schedules within your project.

Since Revit is based off a 3D model, it is easy to see the relationship with other building attributes and identify conflicts earlier in the development process. Architects and consultants have found that this significantly reduces the cost and time to design and the work product has greater accuracy.

***With over 4,200 model SKUs already in our Revit library, Welbilt leads the way in developing Revit Families for the foodservice industry.***

As a company we have made a commitment to helping our customers become more productive and to providing access to our leading brands and unparalleled technologies. We plan on expanding our library each year until the majority of our products are available to the industry in native Revit Families.

As the world's leading foodservice equipment manufacturer, Welbilt recognized the opportunity to maintain our leadership position and have collaborated with early adapters of Revit community to develop a long-term strategy to support the implementation of this software. Welbilt has conducted two years of proprietary research that has tracked a high adaption rate of Revit. We will also continue to support users of AutoCAD by developing content for both platforms.

We have adapted the FCSI design standards so integration into project drawings will be seamless. Architects, consultants, designers and other users will have free access to our library.

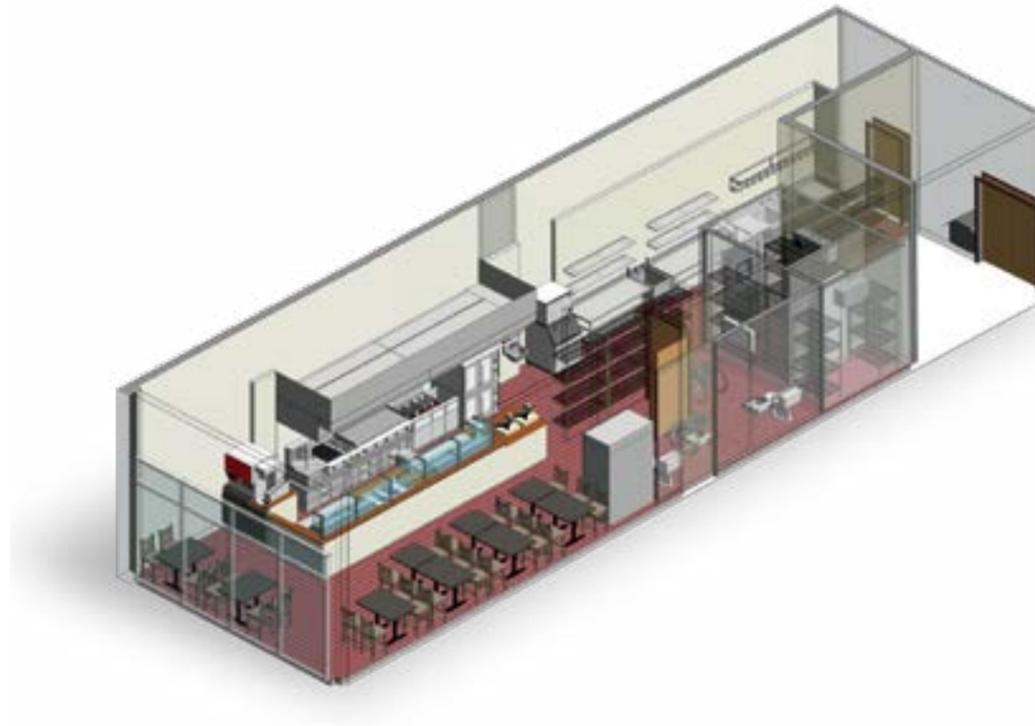

Welbilt is currently distributing Revit content via

Access Welbilt's complete Revit library at [welbilt.kclcad.com](http://welbilt.kclcad.com)

**kcl** KCL's web-based services. KCL has a free add-in program for Revit that provides greater functionality when working in drawings and dynamically switching models. The free application at [www.kclcad.com/revit.asp](http://www.kclcad.com/revit.asp) allows for one-click download of configured native Revit families.

Welbilt also has a search engine that is linked from our website at [welbilt.kclcad.com](http://welbilt.kclcad.com) where you can select either AutoCAD models or native Revit Families and search a master list of Revit families. This will be continually updated as we increase the content of the library.

*Providing the tools and information to help you design, build, and maintain higher quality, more energy-efficient kitchens.*

### WELBILT HEADQUARTERS

2227 WELBILT BOULEVARD, NEW PORT RICHEY, FL 34655  
(877) 375-9300 FAX (727) 372-5875  
WELBILT.COM

Welbilt offers fully-integrated kitchen systems with award-winning product brands: **Cleveland™**, **Convotherm®**, **Crem™**, **Delfield®**, **Frymaster®**, **Garland®**, **Kolpak®**, **Lincoln®**, **Manitowoc®**, **Ice**, **Merco®**, **Merrychef®** and **Multiplex®**. Supported by service brands: **KitchenCare®**, aftermarket parts and service; **FitKitchen®**, fully-integrated kitchen systems; and **KitchenConnect®**, cloud-based open digital platform.
